PETITION FOR ACCEPTANCE OF COLOR PHOTOGRAPHS AS DRAWINGS

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

In accordance with 37 C.F.R. § 1.84(b)(2), Applicant respectfully petitions for acceptance of color photographs as drawings in the above-captioned patent application. These color images are necessary to illustrate the effect of various accelerating voltages from a field emission display which adopts a phosphor screen formed in accordance with the present invention as described at page 6. It should also be noted that the luminescent material is a blue or green light-emitting phosphor. Hence, the color images are necessary for an understanding of the claimed invention, and are the only practicable medium for illustrating the claimed invention, as these phrases are meant in 37 C.F.R. § 1.84.

Concurrently filed herewith is a fee as set forth in 37 C.F.R. § 1.17(h), three sets of the color drawings, and a Preliminary Amendment which amends the specification to include appropriate language as the first paragraph of the section entitled "Brief Description of the

Drawings" at page 3.
